MARCH 27, 2023

REGULATIONS ON THE PREVENTION AND CONTROL OF SHIP POLLUTION IN THE YANGTZE RIVER DELTA

The Shanghai Municipal and Jiangsu provincial government have recently issued local supporting regulations on the prevention and control of ship pollution – *Regulations of Shanghai Municipality on the Prevention and Control of Ship Pollution* and *Regulations of Jiangsu Province on the Prevention and Control of Ship Pollution in the Yangtze River* – which both have come into force as of March 1, 2023.

The two regulations set the obligations for relevant subjects regarding prevention and control of water and air pollution from ships, prevention and control of pollution from ship operations and ship emergency response, as well as the legal liabilities for violation of the regulations.

A circular providing a summary of these requirements and applicability is attached in both [English](#) and [Mandarin](#).
