The American Club has again teamed with its industry partner, ABS Consulting, to publish *Managing Cyber Risks and the Role of the P&I Club: An Overview*.

The document discusses a range of exposures associated with cybersecurity, places them in a P&I context and makes suggestions as to building systems to avoid them. This is achieved through the presentation of various cyber attack scenarios describing their insurance implications and preventative measures to be derived from them.

Members are reminded that the American Club has dedicated a part of its website specifically to issues concerning cyber awareness. It can be accessed at:
