## **CATALOG OF COVID-19 BEST MANAGEMENT PRACTICES FOR THE US MARITIME INDUSTRY**

The US Committee on the Marine Transportation System (CMTS), a federal interagency coordinating committee, COVID-19 Working Group has published a *Catalog of COVID-19 Best Management Practices for the US Maritime Industry*.

The Catalog summarizes various best practices that have been instituted, developed or reported by the US maritime industry. Specifically, it forms a compilation of publicly available industry best management practices and resources related to a variety of issues, including sanitation, health and safety practices, to protect the maritime industry - including merchant mariners - from the impact of COVID-19.

The three parts of the overall catalog are as follows:

- [\*Catalog of COVID-19 Federal Guidance and References for the US Maritime Industry\*](#)
- [\*Catalog of COVID-19 Best Management Practices for the US Maritime Industry\*](#)
- [\*Catalog of Mental Health Resources for US Merchant Mariners and Critical Workforce in the Marine Transportation System\*](#)

Your Managers recommend that Members take note of these documents and be guided accordingly.
