NOTE of INFORMATION

25th October 2014

FRANCE – Temperature Tests on board ships

The Club's Members must be made aware that the French President announced the following decision on the 24th October:

«France must have control systems not only for air flights but also controls on all types of transport even maritime carriage ».

As a consequence of this and <u>as from 26th October 2014</u>, any ship which will have called <u>less than three weeks before they call in France</u> in the countries where EBOLA is declared as an epidemic (Sierra Leone, Guinea and Liberia) will be controlled.

Crew and passengers on board the said ships will be subject to a compulsory temperature test.

For any kind of information in France, the available phone number is:

+33 (0)800 13 00 00
