BRAZIL: DRUG SMUGGLING

Brazil P&I has recently published, [*Drug Smuggling in Brazilian Ports 2024*](#), that provides a summary of drug seizures at key Brazilian ports during that period. The report also gives an overview of locations where drugs have been found onboard vessels and recommends anti-drug smuggling preventative measures.

Members should take note of this information and be guided accordingly. We thank Brazil P&I for making their report available to us, and for the information it contains.
