APRIL 1, 2025

UPDATED JOINT INDUSTRY BEST MANAGEMENT PRACTICES (BMP) FOR MARITIME SECURITY AND ASSOCIATED MARITIME INDUSTRY SECURITY THREAT OVERVIEW (MISTO)

The industry associations of [BIMCO](#), the [International Chamber of Shipping \(ICS\)](#), the [International Marine Contractors Association \(IMCA\)](#), [INTERCARGO](#), [INTERTANKO](#) and the [Oil Companies International Marine Forum \(OCIMF\)](#) - supported by over forty maritime stakeholders - have released a consolidated and enhanced publication:

[BMP Maritime Security](#)

BMP Maritime Security consolidates previously published regional publications into a single, comprehensive publication with actionable insights and advice. It focuses on providing a threat and risk management process and, recognising the dynamic nature of regional security situations, provides signposts to direct users to the most up-to-date security intelligence and risk assessment information.

BMP Maritime Security replaces all existing versions of the BMP that include BMP5, Global BMP and BMP West Africa and these should be removed from ships' libraries and management systems.

In close association with the release of *BMP Maritime Security*, is the [Maritime Industry Security Threat Overview \(MISTO\)](#) developed by BIMCO, ICS, IMCA, INTERCARGO and INTERTANKO. *BMP Maritime Security* and *MISTO* are both now also available at:
