GOOD CATCH UPDATE: *VENT CLOSURE*

Proper ventilation is extremely important for all cargoes and fire safety. A lack of, or improper, ventilation can lead to the build-up of condensation (also known as sweating). It is also critical to be able to properly close vents in the event of a cargo hold or engine room fire. Make a Good Catch by ensuring that all of the vent covers properly close !

In this context, your Managers are pleased to present the latest animated images instalment of the Club's *Good Catch* initiative:

- *Vent Closure* available in [English](#), [new](#) and [traditional Mandarin](#)

As a reminder, all *Good Catch* alerts and animations are posted at the Club's website at:

https://www.american-club.com/page/good_catch

Your Managers recommend that Members take note of this information and be guided accordingly.
